

# Clip-On

The AliWood Clip-On screening system offers a non-combustible and yet versatile timber finish aluminium screening option that overcomes the drawbacks of traditional timber. Using the Clip-On fixing method, AliWood screening is quick and easy to install, hence providing the end-users with a hassle free screening option.

The system can be used internally as well as externally in both commercial and residential settings. Installed horizontally or vertically, the system delivers a natural, stylish and clean look. This architectural timber finish aluminium screening system is ideal but not limited to soffits, ceiling, privacy walls, garage doors and feature walls.

## Concealed Clip-On Fixing

### 15 mm Clip-On Series

The standard aluminium track (COSBPM) is fixed to a wall at a maximum of 450 mm centers. This installation allows for 3 different size visible pieces to clip to it. The clip on fixing offers a clean and concealed look with the possibility of an express line finish. It is ideal for applications such as ceilings, feature walls and garage doors.

### 50 mm Clip-On Series

The backing of 50 mm wide is available in 4 different depths while the 30mm wide battens are available in 3 different depths.. The system gets fixed by simply locking the front piece and the backing together. This offers a clean line where the battens that can be set out to any desired spacing. The system is ideal for privacy screens, fencing, feature walls and any conventional walls. Contact us to find out the largest possible span for the batten you require.

## Colours

AliWood stock several wood look timber finishes, as detailed on our website. We can powdercoat our mill finish range to any colour you wish, in the Dulux and Interpon ranges.
