

# Cladding

The AliWood Cladding system offers a non-combustible and yet versatile timber finish aluminium cladding option that overcomes the drawbacks of traditional timber. AliWood Cladding is quick and easy to install, hence providing the end-users with a hassle free cladding option. The unique AliWood Cladding has a Patent pending.

The system is complete with various trims and flashings and is designed to be used in both commercial and residential situations. Installed horizontally or vertically, the system delivers a natural, stylish and clean look. This architectural timber finish aluminium cladding system is ideal but not limited to fire prone areas, housing, sheds and feature walls....anywhere you would use timber.
